

Docket No. AUS920030941US1

ABSTRACT OF THE DISCLOSURE

**METHOD AND APPARATUS FOR TRANSFORMING SYSTEMS MANAGEMENT
NATIVE EVENT FORMATS TO ENABLE CORRELATION**

A method, apparatus, and computer instructions for system management. A gateway in a network data processing system receives an event in a native event management form. The event is transformed into a new format. The event is correlated in the new format to determine whether a system management action should be performed.
